## Nephure Proudly Partners with the Carlisle-Williams Foundation

*Will donate Nephure sample packs and sponsor the Foundation's PB Dialysis Annual 5K*

**Gainesville, Fla. (September 12, 2018)** – Entring, LLC announced today that they will start donating sample packs of [Nephure](#), the first-to-market oxalate reducing enzyme, to the Carlisle-Williams Foundation for inclusion in their free patient support bags. Entring will also sponsor the Foundation's PB Dialysis Annual 5K.

The Carlisle-Williams Foundation is a non-profit 501(c)(3) organization supporting dialysis patients through hope, comfort and education. The Foundation provides a free dialysis support bag for End Stage Renal Disease (ESRD) patients that is filled with educational resources and comfort items they can use during dialysis and hospital visits.

“One of the foundational pillars of our company is education. We are committed to raising awareness about oxalates and providing resources to help educate people on their kidney health,” said Helena Cowley, co-founder and CEO of Entring. “From the very first time I spoke with Janie at the Carlisle-Williams Foundation, I knew it was good fit. We are excited to partner with them in educating their patients about kidney health.”

In addition to donating sample packs of Nephure, the company will also be sending educational material for the support bags, including a [Low-Oxalate Shopping Guide](#) and [Oxalate-Packed Foods to Avoid](#).

“The Carlisle-Williams Foundation continuously seeks better ways to serve dialysis patients. While looking at improvements and innovations in the kidney health space, I was thrilled and excited to learn about this new product,” stated Janie Carlisle, President and Founder of the Carlisle-Williams Foundation. “Nephure stood out to me as the perfect addition to our ESRD support dialysis bag as it complements our efforts to educate dialysis patients on nutrition. We are very excited to offer this product to our clients and look forward to a continuing relationship with Nephure.”

[Nephure](#) has been commercially available since end of 2017. For more information on Nephure, visit [www.Nephure.com](http://www.Nephure.com). Connect with Nephure on [Facebook](#) and [Twitter](#).

### **About the Carlisle-Williams Foundation**

The [Carlisle-Williams Foundation, Inc.](#) is dedicated to the comfort and preservation of life for End Stage Renal Disease (ESRD) patients. The Foundation works on behalf of the patient to cultivate the bonds between patients, medical staff and the families by providing information and education concerning the disease, job/vocational information, and comfort services through

cards and hospital visits, and support bags to the patients. They are a federally-recognized, national non-profit 501(c)(3) organization that believes no one should feel alone or helpless during illness, nor be stressed by choosing between paying for medical needs or emotional and comfort needs; therefore, all services and products are provided free to patients.

### **About Entring, LLC**

Entring, LLC, based in Gainesville, Florida, specializes in enzyme-based products that provide consumer-friendly choices for people with nutritional limitations. As a subsidiary of the research and development organization, Captozyme Inc., Entring's products are backed by more than 60 years of combined experience in biochemical engineering, including extensive research on innovative approaches for kidney health. Launched in 2017, Entring's [Nephure](#) is the first-to-market enzyme product offering flexibility to people with oxalate-related nutritional limitations.
